Summary

Computer Science student (graduating July 2027) specializing in cybersecurity, with hands-on experience in web and Android penetration testing. Independently reproduced a publicly disclosed CVE and completed a full pentest engagement lifecycle. Holds CCNAv7, Fortinet NSE 4 FortiOS 7.6 Administrator, and HCCDA-Tech Essentials certifications. Strong understanding of OWASP Top 10, network security fundamentals, and secure application design. Continuously sharpening skills through labs, CTFs, and self-directed research.

Experience

Orange Digital Center Egypt | Android Security Training Program / *Jan 2026 – Feb 2026*

Cairo, Egypt | On-site

- Conducted static and dynamic security analysis on Android applications using JADX, Frida, and ADB.
- Identified vulnerabilities including insecure data storage, exported components, and permission misconfigurations.
- Analyzed application behavior to map attack surfaces and assess potential security risks.
- Produced structured findings reports with remediation recommendations aligned to secure development practices.

Digital Egypt Marvels Initiative (DEMI) | Content Creator & CS Educator / *Dec 2025*

Cairo, Egypt | On-site

- Produced 100+ English educational videos for Grades 1–9 covering Python basics, introductory ML, robotics, and cybersecurity.
- Simplified complex technical concepts to support early digital literacy in Egyptian schools.

Teleperformance | Customer Service Agent / *2025 – 2026*

Cairo, Egypt | Hybrid

- Enforced data privacy and account security protocols across all customer interactions.
- Identified and escalated suspected social engineering attempts; ranked in top 10% for accuracy and compliance.

Freelance | AI Data Contributor / *2023*

Remote

- Supplied German-language training data to improve NLP model accuracy.

Security Research & Projects

- **CVE-2025-0133 Reflected XSS Reproduction:** Independently reproduced and validated a reflected XSS vulnerability (Palo Alto PAN-OS) on an AT&T-hosted GlobalProtect portal instance. Analyzed root cause, documented the exploitation scenario, and wrote a structured remediation report.
- **Kioptrix Full Pentest:** Conducted a complete penetration testing lifecycle reconnaissance, exploitation via SQLi, and privilege escalation. Documented the full attack chain, security weaknesses, and mitigation recommendations.
- **SentinelFlow (Graduation Project In Development):** AI-powered automated security testing system targeting business logic vulnerabilities. Leading architecture design and agent orchestration as part of an 8-member team.
- **PHP E-commerce Application:** Built a web app with authentication and role-based access. Applied secure coding practices and analyzed potential SQL injection and access control vulnerabilities during development.
- **Flutter Attendance System:** Cross-platform mobile app integrated with a .NET REST API and SQL database. Implemented role-based access, QR-based attendance scanning, real-time data retrieval, and CSV report export.
- **ATmega32 Embedded Drivers:** Developed ADC, UART, and SPI drivers for an automated temperature control system.

Technical Skills

- **Penetration Testing & Security:** Web (XSS, SQLi, SSRF, Broken Access Control), Android (static/dynamic analysis), OWASP Top 10, Vulnerability Assessment, Bug Bounty (HackerOne, Bugcrowd)
- **Tools:** Burp Suite, Nmap, Wireshark, Metasploit, Nessus, Frida, JADX, ADB
- **Networking & Firewalls:** Cisco (CCNAv7) routing, switching, VLANs, ACLs, OSPF, NAT, VPN; FortiGate Firewall Administration security profiles, IPSec/SSL VPN (NSE 4 Fortinet FortiOS 7.6 Administrator)
- **Programming:** Python, C, C++, JavaScript, PHP, C#, HTML/CSS
- **Systems & Platforms:** Linux (Kali), Windows, PNETLab, Packet Tracer

Certifications

- **CCNAv7** | NTI / Digital Egypt Youth Initiative | *Dec 2025* — 88% score, 120 hours
- **Fortinet NSE 4 — FortiOS 7.6 Administrator** | NTI / Digital Egypt Youth Initiative | *Jun 2026* — credly.com/org/fortinet/badge/fortinet-fortios-7-6-administrator
- **HCCDA-Tech Essentials** | Huawei ICT Academy | *Aug 2026* — Certificate Code: ICT20260819000668
- **Ethical Hacker** | Cisco Networking Academy | *Feb 2025* — credly.com/org/cisco/badge/Ethical-Hacker
- **Cybersecurity Academy** | MCIT & NTI | *Sep 2025*
- **Embedded Systems Level 1** | Orange Digital Center | *Sep 2024*

Education

B.Sc. Computer Science El Shorouk Academy, Cairo, Egypt | *Expected: July 2027*

Additional

- **CTF & Labs:** Active on TryHackMe, Hack The Box, and PortSwigger Web Academy (Advanced Labs: SSRF, JWT Attacks, XXE)
- **Languages:** Arabic (native), English (professional), German (A2)
